Denim Fabrics ludhiana, punjab

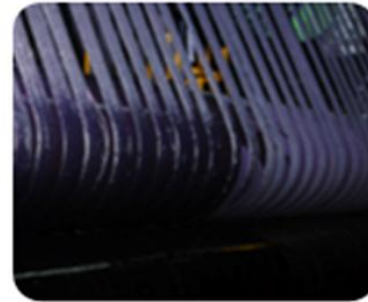

cotton

Located in the Center of India's cotton Belt, the best of long staple high strength and best pick cotton is used.

spinning

High end Zinser's with Compacting Technology, delivers the best vintage ring and Core Spun Stretch Yarns.

dyeing

A flexible and high oxidation Morrison Rope dye technology delivers the darkest of indigo's and the widest of color casts.

weaving

Woven mostly on Sulzer and Picanol, our denims are more dense with high warp coverage and body.

One of the best teams spin, weave, dye & finish 20 million meters every year for some of the most discerning denim brands globally.

Denim Fabrics ludhiana, punjab

finishing

A state of art Japanese Sando Merceriser gives our fabric a clean and sheen look with dark intense colors

coating

The Best and Only Coating Machine from Europe

inspection

Our Gold Standards are the envy of our competition and delight to our clients.

quality assurance

Every input material from fibre to chemical is checked against strict standards, evaluated and then passed. The final fabric lots are checked for shade and strength

consistency and only then moved to despatch.

client servicing

A dedicated multi functional team is engaged with client interface, making it meaningful, solution based ,quick and responsive.

merchandising
& first proto

The Most important step towards client engagement starts here with a dedicated approach to design and proto development. We encourage our teams to ask and re ask questions to get the jean to the right fit and look.

cutting

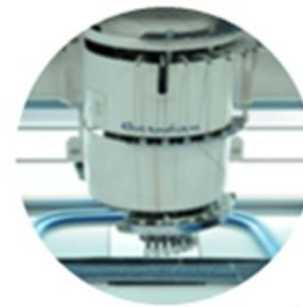

Fabric is approved for shade, shrinkage, skew and de merit points...it's then cut manually with utmost care and precision to maximize yield and reduce wastages

sewing

Panels are individually numbered to maintain cut lot integrity and these are sewn using the best technology and skill sets to get that perfect shape, spi and fit.

In house Embroidery and Printing facilities render flexibility and speed to the process..

dry
process

Here we work hard to make your jeans look old and worn with many different tools. All Italian OMI Set up.

resin
process

Adding to the dry process, our special resin cure process gives the jeans the desired crumples & worn in look. (Tonello Bohemia as well)

wet
process

The Best Washing Machines – complete Tonello set up delivers consistency in shade and look

quality
assurance

Continuous and rigorous quality checks and improvements help us deliver in size and in ratio.

to store

Meticulous planning, inspection, storage & packing enable the jeans to move onto the last leg of its journey to the store & to an endearing client's wardrobe
